Abstract

Aqueous pearl glaze concentrate contains polyol partial ethers and polyol partial hydroxy ethers. Aqueous concentrate contains: (a) 1-99.9 wt.% polyol partial ethers (Ia) with at least 16C and/or polyol partial hydroxy ethers (Ib) with at least 16C obtained by reaction of trimethylolpropane, trimethylolbutane, pentaerythritol and/or dipentaerythritol with saturated and/or unsaturated 6-22C fatty alcohols to give (Ia) or with saturated and/or unsaturated 6-22C epoxides to give (Ib); (b) 0.1-99 wt.% anionic, non-ionic, ampholytic and/or zwitterionic emulsifiers, and (c) optionally upto 40 wt.% polyols. Percentages are based on the concentrate and the remainder to 100% comprises water, adjuvants and additives. Independent claims are also included for the following: (i) preparation of the concentrates; and (ii) preparation of opaque and pearl-glazed surface-active compositions from the concentrates.
